

ESPAÑOL 102

TAREAS PARA ENTREGAR Y EXAMEN FINAL

OBJECTIVE: Learn how to write a story, use your imagination and creativity, learn how to use A.I. (ChatGPT or similar and an image creator like Stable Diffusion) not to do your homework for you, but to help you, get the bot to correct it and see how good or bad it is, and compare some of the corrections with your instructor's.

GRADING: I'll consider your original handwritten papers (creativity, effort trying to use vocabulary and grammar studied during the semester), your ChatGPT prompts, corrections and results for each paragraph, and the effort you put in creating a cool story with pictures you generated with A.I.

- TAREAS PARA ENTREGAR durante el semestre

There are **3 hand in papers** (tarea para entregar) this semester. These 3 papers will constitute 3 chapters of a story you are writing.

- Each paper/chapter must have 10/12 very complete sentences (minimum 6 words each). You have to include vocabulary and grammar studied during the semester.
- First Chapter in the Present tense
- Second Chapter in the Preterite tense
- Third Chapter Past tense (Preterite and Imperfect)

- The **FINAL EXAM** will be a presentation to your class (on the day of the final) of the story you wrote with the images you created with the A.I.

A complete final also includes the steps along the way, the process itself. Apart from the oral presentation, it also includes the 3 emails with your handwritten paragraphs before you do any corrections, the shared chat (the whole chat: all the prompt iterations, the explanation of the corrections and the paragraphs it gives you) and a final document with the paragraphs and the pictures as your finished story.

GRADING: I'll consider your original handwritten papers (creativity, effort trying to use vocabulary and grammar studied during the semester), your ChatGPT prompts, correction explanations and results for each paragraph, the effort you put in creating a cool story with pictures you generated with A.I. **For the oral presentation** I'll consider your fluency and pronunciation when explaining/talking about your story, in Spanish of course. An explanation of any issues you might have had with the programs or process, and any comments related to what you liked or disliked of the homework as a whole. This last part is OK to do in English.

PARA ENTREGAR #1

We'll start with the general ideas and the 1st "chapter" in class together.

1. Think of a story you want to write. Be creative and think of the story as a whole first.
2. Think of the different elements of your story and what you'll have to include later on: the characters (their personality, appearance, etc), the place where the story takes place (describe it), the story itself/event(s)/issue(s)/anecdote(s)/etc. (introduction, middle, conclusion).
3. Write a gist/skeleton of the whole story first. You don't need to write full sentences at this point. Divide the skeleton in 3 parts (these will become your 3 hand in assignments).
4. Write (handwritten) the introduction to your story on a sheet of paper. Don't use a computer to look up words. You can only use your textbook. If you don't know a word (not full sentences) you can write it in English. ChatGPT will give you the word in Spanish (you'll have to check if it's the right word/the word you are really looking for).
5. Once you have 10/12 sentences (minimum 6 words each), you will take a picture with your phone and email it to me at benenati@lclark.edu. Please make sure you don't cast a shadow on the paper, it makes it difficult to read.

6. If you don't have a ChatGPT account (<https://chat.openai.com/>), you'll have to create one. Once you log in, create a chat. (You are going to use the same chat for the whole story, even if you write 3 different chapters/paragraphs).
- 1) Type the story you handwrote (the same one you sent me) and write a prompt (English OK) asking the A.I. to correct the paragraph. The prompt has to be very specific and detailed. You'll have to refine/tweak the prompt until you get the results you want. You have to ask the program to correct spelling and grammar mistakes at a very basic first school term, first year Spanish college level. Also tell it to use only specific tenses, for example Present Simple, if it's your first paragraph or the tenses required for the second and third, otherwise it will include tenses you haven't studied yet.
 - 2) Once you are happy with the corrections, ask ChatGPT to explain the corrections. This step is VERY IMPORTANT, since it will show you what it corrected/changed and why. If you don't understand or like the explanations, come to office hours and we'll go over them together.

We'll do a practice run in class.

7. Next step is creating the images. You will use an A.I. image generator to create the images that will accompany/illustrate your story. You need 2/3 pictures per chapter. **Important:** keep in mind most "free" image creators don't save the prompts, so unless you type them in a separate document first and save it, you will lose everything. You have to include those as part of your final work!
- I use Stable Diffusion (<https://stablediffusionweb.com/>) because it's free and easy to use, but you can use any program you like/want. Students in the past had issues with that particular app, because it took too long to regenerate an image.

PARA ENTREGAR #2 y PARA ENTREGAR #3

Follow steps 4 to 7 to create the body of your story (#2) and the conclusion (#3).

TENSES TO USE: #1 Presente, #2 Preterite, #3 Preterite and Imperfect

After the 1st chapter, remember to go back to the same chat in ChatGPT, do not start a new one. REMEMBER that as part of your "final product", you will have to share your whole chat (all the prompt iterations, explanation of corrections and the paragraphs it gives you) with me.

By the end of the semester

You must have:

- A complete story with 3 parts/chapters: an introduction, a body and a conclusion.
- 2/3 pictures per chapter. These and the paragraphs will become your story and presentation for the final exam.

You also need to save/have:

- The whole ChatGPT "conversation" with your prompts (OK in English) and AI's corrections and final paragraphs
- Your prompts in Spanish and images created by the AI image generator. **Remember** to type the prompts on a different document first, since the image creator will not save them.

I must have:

- 3 tareas para entregar on the due dates during the semester indicated on the homework page
- Final paper with story and pictures
- The whole ChatGPT chat shared with me
- Your prompts in Spanish to create the images with the AI image generator
